

July 30, 2009

Mr. Jonathan Cwern  
Patent Examiner  
US Patent Office  
Commissioner For Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Subject: Application 10/801,922, Art Unit 3737

Dear Mr. Cwern:

Enclosed Please find the following documents:

Response to the Office Action mailed on 06/01/2009

Non-Patent literatures since they are not currently in your file. These literatures are designated as C1, C2, C3, C4, and C5 on the form PTO-892 which has been enclosed with the original application. C2 was the first page of a book called "Sensing with Terahertz Radiation" which is not enclosed.

I am also enclosing a copy of a MOEMS special issue which has a wide range of MOEMS applications. The issue has one-page "Guest Editorial" which explains how MOEMS is an enabling technology and it is a solution to many photonics ideas and miniaturization which were impossible to get to practice due to limitations of conventional optics.

Sincerely,

Manouchehr Motamedi, Inventor

The PTO did not receive the following  
listed item(s) C2 document
